

This is a detailed aeronautical chart of the Springfield, Missouri area. The chart includes the following information:

- Airports:** Springfield-Branson National Airport (KSGF) is the primary airport, with other nearby airports like Springfield-Mid-City (KSGF) and Springfield-Willie B. Hooper (KSGF) also shown.
- Navigation Aids:** The chart displays various navigation aids, including VOR (Very High Frequency Omnidirectional Range) stations, VORTAC (Very High Frequency Omnidirectional Range/Tactical Channel) stations, and NDB (Non-Directional Beacon) stations.
- Communication:** Frequencies for ATIS (Automatic Terminal Information Service), Tower, Unicom (Common Traffic Advisory Frequency), and other communication services are provided for the major airports.
- Obstacles:** Obstacle symbols are shown throughout the chart, indicating the MSL (Mean Sea Level) and AGL (Above Ground Level) heights of various structures.
- Topography:** The chart includes contour lines and spot elevations to show the terrain of the area.
- Communication:** Frequencies for ATIS, Tower, Unicom, and other communication services are provided for the major airports.
- Obstacles:** Obstacle symbols are shown throughout the chart, indicating the MSL (Mean Sea Level) and AGL (Above Ground Level) heights of various structures.
- Topography:** The chart includes contour lines and spot elevations to show the terrain of the area.
